

Capillary

type 915.11

for diaphragm seals in high process temperatures

E 13.60.06

Ed.15.01

Design	Stainless steel capillary with stainless steel spiral armour provides connection between chemical seal and pressure instrument to enable distant reading or remote control.
Material	Stainless steel 316L
Length	Capillary lengths from 1 meter to max 15 meter
Mounting	The capillary is welded between the diaphragm seal and the pressure instrument. As an option the capillary can be delivered as a component with connection G1/2".
Pressure gauge	Pressure gauge with back flange or with mounting bracket for wall mounting
