

## Products and services for Pressure, Temperature, Calibration, Level and Flow

### Well established supplier

Since its inception in 1948, the company is a well-established supplier in the Swedish market with offices and warehouse in Gothenburg. We have technically knowledgeable and experienced sales staff as well as an organization with a high level of service for order management and delivery.

### Products and services

We sell measuring instruments for pressure, temperature, calibration, level and flow to industry, process and shipping. We perform services such as calibration with test protocol, control and repair, filling of diaphragm seals and mounting of components and modification of standard products.

### Market

We work with both smaller and larger customers in all types of markets and handle customer-specific project order with extensive documentation.

### Stock and delivery

Delivery takes place from a large warehouse in Gothenburg with over 2600 different items for fast deliveries. WIKAL's extensive warehouse in Germany complements the range with delivery time of 1-2 days.

### Partner for WIKAL and KSR Kuebler

We are the partner in Sweden since 1970 for WIKAL Alexander Wiegand, who is a leading manufacturer of products for pressure, temperature and calibration. WIKAL is an innovative partner with extensive technical expertise and international approval. WIKAL manufactures over 170,000 units every day and delivers more than 50 million units every year to more than 100 countries. We also represent KSR Kuebler for level measurement.

### Quality and environment

To ensure our success, we continuously strive to improve our processes, our knowledge, skills and motivation. We strive for high customer satisfaction through service, reliability, availability and quality. The company works with continuous improvement and has a certified Environment and Quality Management System according to ISO 14001 and 9001.

### Pressure

Mechanical pressure gauges and pressure switches, as well as electronic pressure sensors and pressure switches. Diaphragm seals for process and sanitary applications. Design for standard measurement or with stainless steel measuring system. Accessories such as valves, syphons, fittings, gaskets and protective equipment.

### Temperature

Mechanical thermometers and temperature switches as well as electronic temperature sensors. Standard design, acid-proof design or with capillary. Measurement of temperatures from -200°C to +1260°C. Thermowells for screw-in or welding

### Accredited calibration

We carry out accredited calibration of pressure instruments according to selected calibration procedures complete with calibration certificate. The calibration is carried out with very accurate calibration equipment in a separate, climate-adapted calibration laboratory. We are accredited for printing according to ISO/IEC 17025:2018 by SWEDAC. Accreditation number 10580. Measuring range -95 kPa...+ 60 MPa.

### Level

Level instrument from KSR Kuebler. Bypass Level Indicator, Sight Glass Level, level sensor and level switch.

### Flow

Primary flow elements from Euromisure. Flow monitors or Flow switches from WIKAL.
